

## Kids' Shoes Measuring Guide

1.

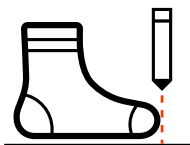

Place page on a flat, hard floor

2.

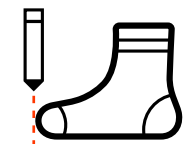

Have them place their heel to the edge of the **ruler line** (marked below). Then measure their foot with the right socks on, if shoes will be worn with socks (for example, football boots)

3.

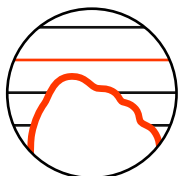

Mark with a pen, where the longest toe ends (it might be the 2nd toe)

4.

Repeat with the other foot

5.

Their shoe size is one line above your marked line. If one foot is larger than the other, use the larger size for both feet

**Print at 100% Scale**

To make sure the printout is  
at the right scale, place a credit  
card in this area.

For accurate measurement, put the edge of a ruler on  
this line and align the back of the heel with it.
